This suffix is used only on Non-NEV Summit, Eagle & Foursome models. Industrial and commercial vehicles do not use this model year suffix designation. The year of manufacture must be determined from company records. 12345= Sequential # Note: SP , when used, indicates this is a Special Vehicle having been significantly modified from the model indicated by the model prefix. It is critical when ordering parts for any vehicle with an SP suffix that you give the entire vehicle VIN to the Columbia ParCar customer service representative to ensure correct service parts are ordered and shipped. T = Transport Alpha character after the numeric characters to identify a CPC Madison Remanufactured Vehicle. *
